Body Lotion

- ❖ Camillia Hibiscus Body Lotion
Contains plant extracts able to enhance the appearance of firmness and smoothness and those known to be supportive of collagen and elastin, known to be phytoestrogens, anti-inflammatory, astringent and anti-oxidant. Rich in Hibiscus Extract and Evening Primrose Oil, Chestnut Extract and Cocoa Bioferment.

Massage/Detoxifying Oil

- ❖ Juniper Cypress Oil
A combination of sunflower oil infused with basil, lemon peel, juniper berries and rosemary along with Chinese herbs and blended with essential oils. This herbal combination is designed to support the liver, lymphatic drainage, and fat metabolism. The Chinese herbs were chosen for their actions on reducing stagnation (fat is stagnation), promoting the proper circulation of Qi and Blood, and rectifying digestion. Massage onto the abdomen or other areas such as thighs or back of arms where cellulite is present to help the body get rid of stagnation.
- ❖ Angelica Vitality Oil
Designed to use for fertility issues. This oil incorporates a selection of Chinese herbs known to treat reproductive issues by tonifying Qi and Blood and allowing their free flow throughout the body. The essential oils used were selected for their properties to tonify reproductive organs, balance hormones and reduce stress, striking a balance between stimulating and warming energies, as well as relaxing and grounding energies.
